

Models A6100 & A6200 Purgemaster 'SNAP-IN' Small Flowmeter

Long-term reliable
performance flowmeters with
low cost-of-ownership

High strength stainless steel body

- the body is corrosion resistant stainless steel, rigidly constructed to maintain tube alignment and resist pipe strain

'SNAP-IN' tube construction

- minimizes the downtime needed to clean the meter tube or to change the meter range

Polycarbonate operator protection shield

- safety tested shield protects personnel from glass fragments in the rare event of accidental tube breakage

Component flexibility

- all parts for the three scale lengths except bodies, tubes and protector shields are interchangeable

Internal backcheck

- restricts back flow and draining of process fluid when metering tube is removed

Choice of operating position

- the meter can be inverted and its tube reversed to change the control valve position from the inlet to the outlet

Options of valve, DP regulator and alarms

ATEX-approved versions available both with and without alarms

- II 2GD approval without alarms; II 2G approval with alarms

Introduction

ABB Purgemaster Flowmeters are low capacity variable area flowmeters for both liquid and gas with an excellent selection of material and scale lengths in a single product family design. They provide optimum flexibility with a minimum number of components. The meter features a corrosion resistant, high strength stainless steel body, quick, easy snap-in tube construction and a safety tested operator protection shield.

A differential pressure regulator is available, which will maintain a constant flowrate of a liquid or gas even when there are pressure variations. It is supplied piped into the meter as an assembly, ready to use.

A constant liquid or gas flowrate is achieved by creating a constant pressure drop. Manually changing the needle valve setting on the flowmeter changes the flowrate value. The differential pressure regulator then maintains this constant flowrate even when the pressure varies.

However when metering gases their compressibility means that – although the supply pressure can change - the downstream pressure must be fixed, if the volume flowrate is to be held at the set value.

In addition, one or two inductive ring sensor alarms can be fitted to certain model variants. These enable High, Low or even High and Low flow trip points to be set and a solid state status signal transmitted. If external switching of signals is to be initiated by these sensors, additional amplifiers/relays should be used.

ABB Purgemasters are ideal for applications such as the purging of control lines and instrument enclosures. Their use is easily extended into fluid sampling, liquid specific gravity, level measurement and similar services.

Specification

Measuring ranges

See measuring ranges on pages 3, 4 and 5

Rangeability

≥10:1

Scale design

% or direct reading scales
Dt/Df ratio scale, millimeters

Accuracy classes (VDE/VDI 3513)

5 in. scale length	
1/4 in. & 1/8 in. tube diameter	2.5

Alarm Unit for Purgemaster

The alarm comprises a ring sensor and associated switching amplifier, available as an accessory, for glass-tube variable-area flowmeters, type A6x31/41 and A6x32/42.

Clamped directly to the body, the ring sensor is continuously adjustable across the overall metering range. The ring sensor can be used with all metal-float equipped flowmeters according to the capacity tables.

Principle of Operation

The ring sensor, with a bistable switching action, energizes the relay in the amplifier when the float reaches the trigger level. It remains in that position, even if the float continues to move towards the alarm zone, thus leaving the trigger level. The relay de-energizes as soon as the float crosses the trigger level from the opposite direction and moves back from the alarm zone into the normal operating range. The actual float position – above or below the trigger level – is indicated precisely.

Operation in a hazardous area is possible, since the ring sensor used is an intrinsically safe switch with an intrinsically safe circuit. Flowmeter Model A6x31/41 is suitable for use either as a minimum alarm or a maximum alarm, due to its short metering tube. Model A6x32/42 is recommended if both alarm operations are required.

Design Features

- Sensor height 14 mm, minimizes coverage of the scale
- Integrated clamp secures device directly to the meter body
No automatic adjustment during operation is possible

Specification – Ring Sensor

Part Nos.

Measuring tube 1/8 in. type RC10-14-N3-Y115614

Measuring tube 1/4 in. type RC15-14-N3-Y115615

Supply voltage

10 V DC

Operating range

In direction 1 – 2.9 mA

In direction 2 – 4.8 mA

Permissible resistance of control cable

≤ 100 Ω

Repeatability

1 % (T = constant)

Temperature drift

± 10 %

Permissible ambient temperature

0 to 40 °C (32 to 104 °F)

Permissible process temperature

0 to 40 °C (32 to 104 °F)

Connection cable

LIFYY x 0.14 mm²

Cable length

5 m (16.5 ft)

Housing

Black Polycarbonate

Protection type as per EN 60529

IP67

Certificate of conformity

Ring Sensor only:	PTB 99 ATEX 2128X II 2G EEx ia IIC T6
Flowmeter with Ring Sensor:	BASEEFA 03 ATEX 0424X II 2G EEx c T6 – T4
Flowmeter without Ring Sensor:	BASEEFA 03 ATEX 0424X II 2GD EEx c 130°C

Weight

40 g (1.4 oz.) approx.

Specification – Switching Amplifier

Switch amplifier

Amplifier	Supply Voltage	Channels
KFD2-SR2-Ex1.W	24 V DC	1
KFD2-SR2-Ex2.W	24 V DC	2
KFA5-SR2-Ex1.W	115 V AC	1
KFA5-SR2-Ex2.W	115 V AC	2
KFA6-SR2-Ex1.W	230 V AC	1
KFA6-SR2-Ex2.W	230 V AC	2

Protection class

IP20

Electrical connection

Terminals

Weight

0.15 kg (0.33 lb) approx.

Output

Relay with potential-free changeover contacts.

Switching capacity max. 2 A at 250 V AC

Power consumption

Max. 1 W

Permissible ambient temperature

-20 to +60 °C (-4 to 140 °F)

Ex protection

Circuits in Zone 0/1/2 – EEx II (I) G D [EEx ai] IIC

$U_o = 10.5 \text{ V}$

$I_o = 13 \text{ mA}$

$P_o = 34 \text{ mW}$

Certificate number

PTB 00 ATEX 2080

Electrical Connections

Electrical Connections

Overall Dimensions

Ring Sensor

Switch Amplifier
